

Drilling Engineer

Contact Energy
Wairakei, Taupo

- Focus on world class drilling industry practices
- Busy role, multiple projects to be involved in
- Work with a team of leading geothermal industry professionals

This is your opportunity to work with a team of leading geothermal industry professionals. Our Geothermal Resources team, explore, develop and manage geothermal resources to ensure their long term sustainable use. This is a busy and varied role where you will develop business proposals for drilling, complete well designs, prepare technical drilling specifications and cost estimates and manage drilling and drilling service contractors. There is a strong emphasis on health & safety excellence in this team and you will be involved in implementing world class drilling industry technology and process improvements.

Essential to securing this role will be your experience with well drilling programme development and management and ideally you will have geothermal drilling experience. You will be degree qualified, have experience in preparing reports, scope specifications, tenders and contract documents as well as experience managing drilling contractors. Your excellent relationship building skills, strong problem solving and data analysis skills along with your focus on health & safety excellence will help ensure your success in this role. A commitment to working within a team and a responsiveness to new ideas are important in this team.

At Contact we are committed to being **first** when it matters. To do this we need your **fresh** ideas and **open** approach. **Unite** with Contact to explore, uncover and discover your future.

Applications close 9am Tuesday 24 April 2012.
