

## Mechanical Engineer

Contact Energy  
Wairakei, Taupo

- A role that will offer a lot of variety.
- Specialist technical role for geothermal assets.
- Join a world class geothermal energy business.

Contact has a world class geothermal energy business and right now it's full steam ahead. You will work with a team of highly skilled Geothermal Engineers as part of our Engineering team. Your focus will be on steamfield and power station plant and this is a role that will offer you a lot of variety. You will provide mechanical engineering expertise and technical advice, helping to ensure plant safety, availability, capability, reliably and efficiency.

Essential to securing this role is your ability to effectively resolve complex issues, excellent communication skills and results orientated approach. You will be a mechanical engineer who has experience with geothermal or thermal steam plant and pressure equipment. Due to the diverse nature of this role it would be advantageous if you had experience with process engineering, managing and coordinating plant engineering projects and experience with multidiscipline projects.

At Contact we are committed to being **first** when it matters. To do this we need your **fresh** ideas and **open** approach. **Unite** with Contact to explore, uncover and discover your future.

Applications close 9am Monday 28 May 2012.
